

Market Insights

Real-Time Market Intelligence Pipeline with NLP and RAG

Learning Resources and Contributor Onboarding

Doctum Consilium

Generated 2026-05-08

Abstract

This document provides a curated list of courses (Coursera, Pluralsight, A Cloud Guru), training repositories, and reference books to help contributors ramp up on the technologies used in **Market Insights**. Resources are selected for quality, relevance, and practical applicability.

Contents

1 Prerequisites	2
2 Coursera Courses	2
3 Pluralsight Courses	2
4 GitHub Training Repositories	2
5 Reference Books	2
6 Suggested Learning Path	2
7 Free Resources	3

Prerequisites

Before starting the courses below, ensure you are comfortable with: Python data pipelines, SQL, NLP fundamentals, Vector Databases, Airflow.

Coursera Courses

Course	Link	Why relevant
Natural Language Processing Specialization	link	NLP tokenization and embeddings.

Table 1: Coursera

Pluralsight Courses

Course	Link	Why relevant
Apache Airflow: The Hands-On Guide	link	Pipeline DAG orchestrations.

Table 2: Pluralsight

GitHub Training Repositories

- [apache/airflow](#) — Airflow examples.
- [langchain-ai/langchain](#) — RAG architectures.

Reference Books

- *Designing Data-Intensive Applications* — Martin Kleppmann. Foundational for pipeline reliability and data consistency.
- *Natural Language Processing with Transformers* — Lewis Tunstall et al.. Transformer models, fine-tuning, embeddings.

Suggested Learning Path

1. Complete prerequisites (1–2 weeks).
2. Work through the Coursera specialisation most relevant to the repo’s domain (4–8 weeks).
3. Clone the repository, read `README.md` and `INFRASTRUCTURE.md`.
4. Run the service locally following the **Local Run** section of `INFRASTRUCTURE.md`.
5. Study the Pluralsight courses for the specific tools used (2–4 weeks, parallel).
6. Contribute a small fix or documentation improvement as a first PR.
7. Study the GitHub training repositories for advanced patterns.

Free Resources

- [Python Official Tutorial](#) — free, authoritative.
- [Kubernetes Interactive Tutorials](#) — browser-based k8s labs.
- [FastAPI Tutorial](#) — official, comprehensive.
- [PyTorch Tutorials](#) — official, covers all levels.
- [DeepLearning.AI Short Courses](#) — free, recent AI topics.
